

WebQA Director of Application Development (Player/Coach)

SUMMARY: Fast growing Chicago-based internet-service company is looking for a Director of Application Development to lead expansion of its product base. The ideal person will not only manage a team of developers and outsourcers, but also take an active role in creating and developing products.

COMPANY: **WebQA** (www.webqa.net) is a leading provider of Customer Communication and Service platforms - helping organizations serve over 100 million people worldwide. **WebQA's** affordable and comprehensive set of multilingual inbound and outbound service, information, communication, collaboration and payment tool helps service centers handle both customers and employees over the phone, web or in-person. **GovQA** is the definitive leader in Citizen Service and 311 systems for local governments; **BizQA** assists global 1000 organizations worldwide including some of the world's largest financial institutions; and, **EdQA** manages student issues and concerns for the top universities in North America.

POSITION: We are currently seeking a full-time, Director of Application Development to be a key member of our technology team. You will direct a team of software development professionals, coordinate outsourced development and collaborate with a quick-thinking management team in our Woodridge, Illinois facilities as part of a fast-growing internet service company.

This position will take a hands-on orientation toward product development and assist our organization in dynamically developing, fine-tuning and continually releasing an ongoing stream of market – leading products.
